

What the attending delegates have to say about the conference.

**ERTEP 2007**

## TESTIMONIALS

Let me commend you for the great feat of hosting ERTEP 2007 successfully. It was indeed a grand success that I am very proud to have been involved; to say that I had a great time in Ghana is an understatement.

Glad to inform you that every delegate from Nigeria was satisfied with the "entire package" of ERTEP 2007 - your team delivered. Everything worked according to plan and most of all, Nigerian delegates returned home safely.

Thanks again for a great conference, and the opportunity to meet so many great colleagues, especially those from all over Africa. I hope to keep in touch and, hopefully, look into the possibilities of indigenous technologies/science and their transfer to the next generation via incorporation into the tertiary educational curriculum.

Many thanks for a very successful conference! It was really lovely to meet up with you again, and lots of fun!

Following the conference, we went on the tree-top rainforest canopy tour and around Elmina Castle, which was a wonderful and awe-inspiring tour.

It was so nice to meeting you in Accra. Everything was well done. Thank you again for your hospitality and kindness. Hope we will cooperate in the future.

First of all, congratulations on a well-organized conference in Accra.

Once again congratulations on your successful chairmanship of the Conference.

Congratulations for a successful and wonderful hosting of ERTEP 2007, Accra, Ghana. The organization was superb and I did enjoy every bit of it. I was profoundly impressed. More grease to your elbows!

---

Following the ERTEP conference (July 16-19, 2007), Accra, Ghana, MAMSCO has initiated the process towards offering North MAMSCO CITY as model for the implementation of Solar and Biomass Technologies.

In conclusion, MAMSCO plans to keep you posted of any future positive outcomes of the ERTEP conference. Thank you for a job well done.

---

I want to congratulate you for the conception and organization of ERTEP 2007. I enjoyed very much the conference, and Ghana, and the opportunity of getting acquainted with so much new for me and of meeting very nice and enthusiastic people.

Hopefully we can in the near future cooperate in research that would link us with you and universities in Ghana.

---

I am very proud of you. You have showed that that it was possible to make a difference and you did.

---

It was nice meeting you at the conference in Ghana although we could really not talk because I reckoned you were very busy. I must say the arrangement was wonderful. Congratulations!

---

Just a word of appreciation to you for organising a fantastic conference. I enjoyed it very much and will definitely attend the next one (in Brazil?).

Thanks for an excellent conference and congratulations to you and your whole conference team.

Congratulations on the success of the First International Conference on Environmental Research, Technology and Policy (ERTEP 2007), July 16-19, 2007.

I want to congratulate you for organizing the just-ended ERTEP conference in Accra. It gave most of us in Ghana a chance to meet new people and share our research experiences with them. I hope that you and your able team will continue to organize more of such conferences in the future.

Thanks so much for organizing such a conference. I must confess that I've been exposed to things I may not have known all my life.

Saying thank you so much for the successful first ERTEP conference you organized. I learnt a lot and the challenge is much. For the opportunity it availed me to meet with others from all parts of the world working on the same area as I do. I say thanks.

I just want to congratulate you for organizing the just-ended ERTEP conference in Accra. It gave most of us in Ghana a chance to meet new people and share our research experiences with them. I hope that you and your able team will continue to organize more of such conferences in the future.

I was in China on a UN programmed and couldn't attend as I earlier schedule. I received information that the ERTEP conference was successful, congratulations.

I benefited considerably from the different experiences shared by the Keynote and Plenary speakers including many paper presentations, under the eight major topics relating to resource exploitation and consumption, development of environmental monitoring and remediation technologies, gender issues in environmental stewardship, and building the capacity for environmental policy making to protect fragile ecosystems. I benefited, further, from the short course on Design, Analysis and Management of Landfills that ably covered important environmental issues being faced by many municipalities and other population centres in many nations.

I look forward to sharing the knowledge, ideas and practices gained from this conference with my immediate and broader communities in Zambia, as we collectively tackle the various global environmental issues.
